Home Economics I

Instructions:

- * Answer all questions.
- * In each of the questions 1 to 40, pick one of the alternatives (1), (2), (3), (4) which is correct or most appropriate.
- * Mark a cross (X) on the number corresponding to your choice in the answer sheet provided.
- * Further instructions are given on the back of the answer sheet. Follow them carefully.

1. From the following, what is the complete protein?
 (1) Gelatin (2) Legumin (3) Caesin (4) Gluten
2. The two essential fatty acids are
 (1) Arachidonic acid and Linoleic acid. (2) Oleic acid and Linolenic acid.
 (3) Linoleic acid and Linolenic acid. (4) Arachidonic acid and Oleic acid.
3. What is the irrelevant statement regarding dietary fibre?
 (1) Absorbs water in the intestine
 (2) Eases digestion of food
 (3) Increases the bulk of stools
 (4) Eases bowel elimination
4. Select the response which contains the food items suitable for a child suffering from Rickets.
 (1) milk, sprats, gotukola (2) fish, green gram, pumpkin
 (3) spinach, butter, meat (4) eggs, coconut, dates
5. The deficiency of which of the following nutrients causes Beri-beri?
 (1) Thiamine (2) Niacin (3) Vitamin K (4) Vitamin C
6. From the following the food item which contains the highest percentage of protein is
 (1) dhal. (2) soyabean. (3) cashew nuts. (4) gingelly.
7. Following are some statements regarding nutrition.
 A – Pyridoxine is named as vitamin B₆.
 B – Iron, Zinc and Phosphorus are identified as microminerals.
 C – Fish contains the proteins collagen, myosin and actin.
 D – Barley wheat and oats contain maltose.
 From these, the correct statement/statements is/are
 (1) D only. (2) A and B only. (3) B and C only. (4) A, C and D only.

8. The nutrients abundant in the food groups at the top of the food pyramid are
- (1) carbohydrates, fats, vitamin A and vitamin E.
 - (2) protein, fats, vitamin C and vitamin D.
 - (3) fats, calcium, vitamin A and vitamin B₂.
 - (4) protein, carbohydrates, vitamin K and vitamin B₃.
9. Which of the following breakfast is the most nutritious?
- (1) bread with butter and jam, milk tea
 - (2) green leaves mixed roti, lunumiris, white gravy, coffee
 - (3) pittu, savoury fish curry, seeni sambol, malted milk
 - (4) string hoppers, fish ambulthiyal, coconut sambol, green leaves conjee
10. When planning meals for a person of old age,
- (1) carbohydrate and iron containing foods should be increased.
 - (2) protein and calcium containing foods should be increased.
 - (3) fats and calcium containing foods should be decreased.
 - (4) fats and protein containing foods should be decreased.
11. From the following, the daily energy requirement is highest for
- (1) an adolescent girl.
 - (2) an adolescent boy.
 - (3) a pregnant mother.
 - (4) a lactating mother.
12. Two enzymes in the intestinal juice are,
- (1) Amylase and Pepsin.
 - (2) Trypsin and Lactase.
 - (3) Peptidase and Sucrase.
 - (4) Lipase and Renin.
13. From the following, select the cooking method which retains most of the nutrients.
- (1) steaming
 - (2) pressure cooking
 - (3) roasting
 - (4) frying
14. The two foods cooked by the methods of heat transmission conduction and convection respectively are,
- (1) patties and cutlets.
 - (2) string hoppers and thosei.
 - (3) roti and soup.
 - (4) kevu and rice.
15. Which of the following statements is **false** regarding meal service?
- (1) The host and the hostess should sit at the two sides of the table.
 - (2) The waiter should serve food from the right side.
 - (3) Should be seated until all the members finish the meal.
 - (4) The soiled plates should be removed as soon as the meal is over.
16. A symptom of kwashiorkor is
- (1) severe wasting.
 - (2) numbness of hands and feet.
 - (3) oedema.
 - (4) soreness of the mouth.
17. An external factor affecting spoilage of food is
- (1) pH value.
 - (2) substrate.
 - (3) water activity.
 - (4) temperature.
18. When preserving food by deep freezing
- (1) pathogenic organisms are destroyed.
 - (2) non pathogenic organisms are destroyed.
 - (3) microbial growth is suspended.
 - (4) all the organisms are destroyed.
19. A feature showing the mental development occurring in an adolescent is
- (1) expression of ideas clearly.
 - (2) desire to be prominent.
 - (3) imitation.
 - (4) hero-worshipping.

20. A sexually transmitted disease which is cured by treatment, but has a tendency of reoccurrence is
 (1) Syphilis. (2) Gonorrhoea.
 (3) Herpes. (4) Trichomoniasis.
21. What is the most suitable age range for pregnancy ?
 (1) 16 - 22 years (2) 20 - 28 years
 (3) 28 - 32 years (4) 30 - 35 years
22. The most important nutrient for the formation of nerve cells, which starts from the onset of embryonic development is
 (1) vitamin A. (2) vitamin C. (3) folic acid. (4) iron.
23. For how many days does a mature ovum after ovulation stay alive in the fallopian tube?
 (1) about two days (2) about three days
 (3) about five days (4) about seven days
24. Select the correct statement regarding pre-natal development.
 (1) Period of ovum is about seven days.
 (2) The period from fertilization to 3 months is termed as embryonic stage.
 (3) The endometrium is the special structure formed for the nourishment of the foetus.
 (4) The secretion of reproductive hormones is controlled by the Follicle stimulation hormone.
25. At which age does the last dose of oral polio vaccine is given to a child?
 (1) at three years (2) at four years (3) at five years (4) at six years
26. Apart from the three diseases included in the Triple vaccine, select the other two diseases prevented by the Pentavalent vaccine.
 (1) Measles, Hepatitis B (2) Hepatitis B, Haemophilus Influenza B
 (3) Haemophilus Influenza B, Rubella (4) Rubella, Hepatitis B
27. Two decorative stitches showing a similarity in the stitch are
 (1) lazy daisy stitch and stem stitch. (2) cross stitch and chain stitch.
 (3) chain stitch and lazy daisy stitch. (4) stem stitch and cross stitch.
28. Following are some instances of using a stitch.
 ● in finishing the raw edges of a seam
 ● in stitching scallops
 ● in applique work
 This stitch is
 (1) blanket stitch. (2) tailor's stitch.
 (3) herringbone stitch. (4) running stitch.
29. Select the correct sentence from the following.
 (1) Herringbone stitch is a decorative stitch done by removing few threads from the edge of the fabric.
 (2) Tailor's chalk and thimble are two tools used in constructing accessories.
 (3) Hemming stitch should end with a knot.
 (4) Zippy stitch is used to decorate the bodice of an infant garment.
30. Select the fact that should **not** be followed when sewing backstitch.
 (1) Sewing from right to left
 (2) Sewing three stitches on each other at the start
 (3) Similarity in the size of the stitches
 (4) Cutting the thread at the end of stitching

31. Consider the following statements.

- A – Sewing a design by running stitch gives a raised effect to it.
 B – Burning cotton fabrics evolve the smell of burning paper.
 C – Canvas material is essential to sew cross stitch.

From these, the correct statement/statements is/are,

- (1) A only. (2) B only. (3) C only. (4) A and B only.

32. From the following fibres, an animal fibre and a synthetic fibre respectively are,

- (1) silk and orlon. (2) wool and rayon. (3) silk and rayon. (4) nylon and terylene.

33. What is the decorative stitch made by using a basic stitch ?

(1)

(2)

(3)

(4)

34. Two facts regarding infant garments are

- (1) beauty of the dress and made of rayon fabric.
 (2) having small motifs and made of terylene fabric.
 (3) use of light colours and made of polyester fabric.
 (4) ease of wearing and made of lawn fabric.

35. Select the adjacent colour scheme.

- (1) yellow orange, orange, red purple (2) yellow green, green, blue
 (3) purple, blue purple, blue green (4) yellow, yellow orange, orange

36. Select the response which includes the feelings induced by curved lines.

- (1) calmness and serenity (2) elegance and joyfulness
 (3) restlessness and activeness (4) broadness and delicacy

37. The correct fact to be followed when building a house is

- (1) the master bedroom at least 120 square feet.
 (2) the smallest room, not less than 80 square feet.
 (3) $\frac{1}{6}$ of the area of the rooms, allocated for windows.
 (4) the height of the room, at least $8\frac{1}{2}$ feet from the roof/ceiling.

38. Which of the following features is correct, when observing the bathroom of a house?

- (1) Having high windows (2) Placing the washing machine near the shower
